About Me

I am a software developer and quality assurance professional with 4+ years of experience in software development and testing. Skilled in engineering scalable server-side applications, designing user-centric interfaces, and ensuring software quality through rigorous testing and process improvement. My focus on user privacy, performance optimization, and defect prevention has consistently enhanced system reliability and user satisfaction. I am passionate about combining software engineering expertise with strong QA practices to deliver high-performing, secure, and user-friendly products. Eager to contribute to a dynamic team where innovation, quality, and continuous improvement drive success.

Work Experience

Hybrid
2023-Present

FullStack Software Devopser | CRM Manager | Quality Assurance Lead – Uplus

- “Uplus is a digital group financing platform enabling social and economic growth interoperability. Uplus, a fintech firm, revolutionizes the savings experience via an app. It empowers financial success by enabling goal-setting and communal sharing, transforming how people save.”
- **UI/UX Design & Front-end Development:** Create intuitive, visually appealing interfaces with React.ts, Tailwind, Daisy UI, and TypeScript. Conduct user research, design wireframes and prototypes, and perform front-end usability testing to enhance the user experience.
 - **Backend Development:** Build robust applications using Nest.js. Implement RESTful APIs, ensuring efficient data handling, security, and performance optimization.
 - **API Development & Integration:** Develop and integrate APIs connecting front-end and back-end systems. Conduct API testing to ensure reliable communication and data exchange across services.
 - **Quality Assurance & Testing:** Led end-to-end QA processes, including manual, functional, regression, and system testing for web and mobile applications. Utilized tools such as Jira, TestRail, Postman, and Selenium to manage test cases, log defects, and validate software against business requirements. Ensured smooth deployments through continuous testing, debugging, and user acceptance testing (UAT).
 - **State & Database Management:** Manage application state with Redux Toolkit and Context API. Design and integrate MySQL databases for efficient, scalable data storage and retrieval.
 - **Collaboration & Documentation:** Work closely with cross-functional teams to align on project goals. Maintain detailed documentation of test cases, codebase, and APIs. Use Git for version control to ensure a clean, maintainable, and transparent development workflow.

Frontend Developer – Apertacura

ApertaCura is a proactive health and wellness company that offers a digital platform combining smart technology and personalized insights. Its mission is to help individuals and organizations manage their health before problems arise, rather than reacting after they occur. By using intuitive, data-driven tools, ApertaCura simplifies health management and empowers users to live healthier, longer, and more resilient lives.

- **UI/UX Design & Front-end Development:** At ApertaCura, I lead the design and development of clean, responsive, and user-centric web interfaces using Next.js (TypeScript), Tailwind CSS, and Daisy UI. I collaborate closely with clients and stakeholders to gather requirements, conduct user research, and translate insights into wireframes, prototypes, and high-fidelity designs. My focus is on delivering accessible, high-performing websites that elevate user experience across all devices. Working alongside cross-functional teams, I ensure seamless integration with backend systems and contribute to delivering scalable, maintainable, and impactful digital solutions.

Remote
2024-2025

Frontend Developer | Quality Assurance Lead – NexGen

NexGen is a web development agency specializing in designing and building responsive, user-friendly websites for clients, tailored to meet their business needs and enhance their online presence.

- **UI/UX Design & Front-end Development:** Designed and developed intuitive, visually appealing web interfaces using Next.js, TypeScript, Tailwind, and Daisy UI. Conducted user research, created wireframes and prototypes, and optimized website performance, responsiveness, and accessibility across devices. Collaborated closely with cross-functional teams to integrate front-end designs with back-end systems, ensuring seamless functionality and scalability.
- **Quality Assurance & Testing Leadership:** Spearheaded QA processes to ensure website functionality, usability, and compliance with client requirements. Performed manual, functional, and regression testing across browsers and devices to validate responsiveness and performance. Utilized tools like Jira for test management and defect tracking.
- **Automation & API Testing:** Conducted API testing using Postman and Swagger to verify integration between client and server components. Implemented automated UI testing with Selenium and Playwright to streamline repetitive test cases and improve release efficiency.
- **Performance & Accessibility Testing:** Used Lighthouse, Chrome DevTools, and GTmetrix to evaluate and enhance site performance, load speed, and accessibility compliance (WCAG standards). Ensured all websites delivered met both technical and user-experience benchmarks.
- **Collaboration & Documentation:** Worked with developers, designers, and project managers to establish QA standards and maintain clear documentation of test plans, bug reports, and deployment checklists. Used Git for version control and maintained detailed QA documentation to support continuous improvement and transparency.

2022-2023
9 Months

Fullstack Software Developer – Andela Technical Leadership Program

“A nine-month career accelerator empowering Rwandese nationals to become world-class full-stack software engineers.”

- Immersed in various software development languages and technologies through comprehensive training as an intern at Andela.
- Excelled at crafting efficient, testable code and collaborating within dynamic teams to drive successful project outcomes.
- Actively contributed to code documentation and explored innovative technologies for enhancement.
- Played a key role in release and sprint planning sessions, optimizing performance, and elevating the overall user experience.
- Write unit, integration, and end-to-end tests with Jest and Mocha. Implement CI/CD pipelines with tools like GitHub Actions to automate testing, building, and deployment.
- Manage code changes and collaborate with team members using Git. Maintain a clean and organized codebase with well-documented commits and pull requests.
- Monitor and optimize both front-end and back-end performance. Use tools like Webpack, and server-side caching strategies to improve load times and responsiveness.

Skills

Programming Languages:

- JavaScript
- TypeScript
- Python

Databases:

- MySQL
- PostgreSQL
- MongoDB

Methodologies:

- Agile development

Tools:

- Git / GitHub
- Jest
- Mocha
- Webpack
- CI/CD pipelines (GitHub Actions)
- Postman
- Jira
- TestRail
- Selenium

Soft Skills:

- Teamwork
- Communication
- Problem Solving
- Innovation-Oriented
- Self-Organized
- Debugging

Frameworks and Libraries

- React.js
- Next.js
- Redux
- Tailwind
- Material UI
- Node.js
- Express.js
- Nest.js
- React Native
- Expo

Education

2019-2022
4 years

UR College of Science and Technology
Bachelor of Engineering Honors Software Engineering
